

Doctoral Program in RNA Biology

as part of the
International PhD Program in Molecular Life Sciences
at the Max F. Perutz Laboratories (MFPL) in Vienna

PARTICIPATING GROUPS:

Andrea Barta, Program Coordinator
Post-transcriptional regulation of gene expression in plants

Udo Blaesi
Post-transcriptional regulation in Bacteria and Archaea

Michael Jantsch
RNA editing of coding and non-coding substrates

Ivo Hofacker
RNA Bioinformatics

Michael Kiebler
Dentritic RNA transport in mammalian cells

Alwin Köhler
Ubiquitin signaling and chromosome biology

Isabella Moll
Ribosomes and antimicrobial agents

Silke Dorner (associated group of the DK RNA Biology)
Regulation of gene expression by small non-coding RNAs

Visit the Max F. Perutz Laboratories PhD program web-site for information and application:
